

IMPORTANT TO STOCK FARMERS.

GROWTH OF WOOL.

G WILSON'S Improved Preparation for Dipping Sheep is nearly 25 per cent. CHEAPER than any other Preparation now in use, and is now universally acknowledged to be "*superior to anything that has hitherto been used, whether for salving or dipping.*" Since its introduction into Yorkshire, about 13 years ago, the quantity used has been nearly doubled each year. In 1843, in Yorkshire, no less than 50,000 Sheep were dipped—a proof of its superiority over all other Preparations for Dipping Sheep. The cost of Dipping does not exceed 1¼d. per head.

In less than half an hour the Bath destroys all kind of Vermin to which Sheep are subjected, renders the Wool beautifully white, highly nourishes and increases the growth, being free from those corrosive or mercurial preparations so frequently used in other dipping stuff. The original and only Sheep-Dipping Composition has not only been found to increase the flow of the unctuous semi-solid matter, so essential to the growth, but also to retain the Wool, superior to laid Sheep, being a sure preventative against Scab, or the attack of the fly. GEORGE WILSON having secured extensive patronage all over Great Britain and the Colonies, induced a few imposing adventurers to start into the field, with base and dangerous imitations, to snatch from the Original Inventor the just recompense of his labour. The fearless way resorted to by the imitators, in palming upon the credulous their Deleterious Compositions, (with labels copied from the genuine) renders it the imperative duty of George Wilson to call the attention of the public to the fact, that he is the inventor and ONLY preparer of this highly valuable chemical discovery, now twenty years used so successfully by thousands of the most distinguished breeders in the world. Those who used imitations a few years back killed many valuable Sheep; their teeth were so much affected as to prevent them from feeding upon turnips, and, in many instances, were obliged to apply for the genuine to re-dip them.

TESTIMONIALS.

Wellington, New Zealand, 19th Dec., 1846.

Mr. Wilson,

Sir,—I have abstained acknowledging the receipt of the 60 Packets of your Sheep Bath, sent out to me last year, until I had given it a fair trial, which has been so satisfactory, that I now regret not having any to use for the present season. Others are also wishful to try it; and as there is every prospect of Sheep Farming being carried on to a considerable extent in New Zealand, I have no doubt but that in the course of another year, there will be a demand for a considerable quantity. In the mean time I should be obliged by your sending out to me sufficient to bathe 10,000 Sheep.

I have no doubt of being able in another year to inform you that it will be worth your while to send out a much larger quantity, and to appoint an agent in this Colony, and you may depend on my attending to your interests in the matter.

For the present order you can receive payment from my agents in London, or from George Clifford, Esq., Wycliffe Hall, Greta Bridge, Yorkshire; I should prefer the former course, and future transactions will be through Messrs. Mangles, Price, & Co., New Broad Street, London, to whom I should be obliged by your forwarding the Packages for exportation, as soon after the receipt of order as convenient. If in London before the 10th July next, they will be in time to be shipped per the *Ralph Bernal*.

As Wool-growing in New Zealand is only just commencing, and there is a variety of opinions as to the effect the climate will have on that article, I enclose a few samples of my Clips of this year, and should be glad of the opinions of any competent judges you may be able to shew them to.

I remain, your obedient Servant,

CHARLES CLIFFORD.

Copy of a Letter from Thomas Hopper, Esq., an Extensive Flock Master, in the East Riding of York.

Kelleythorpe, near Driffield, May 31, 1844.

Sir,—As you wish for my opinion relative to the qualities of Wilson's Sheep-Dipping Composition, I beg to inform you that within the last two years I have dipped upwards of 2400 Sheep and Lambs, with great benefit. It effectually destroys the Vermin, promotes the growth of Wool, and conduces to the general health of the Animal; and I shall certainly continue to use it, and recommend it to my friends.

I am, Sir, your obedient Servant,

THOMAS HOPPER.

To Mr. F. C. Matthews, Driffield.

Prepared at the Medicine Warehouse, Coldstream, and Hawick; and sold by authorised Agents, throughout the United Kingdom and Colonies, in Packages to dip 50 Sheep, at 3s. 9d. each Package.

N.B.—"GEORGE WILSON, Chemist, Medicine Warehouse, Coldstream, and Medicine Warehouse, Hawick," is on the Seals of every Genuine Package, with full directions how to prepare and use.

Sole Agents for New Zealand:

MR. WM. DALRYMPLE & SON,

Brooklands, Dunedin; and to be had of Mr. W. H. MANSFORD, Port Chalmers.

W. D. was Agent for the above Sheep Dip for many years in Scotland, in the Counties of Perth, Forfar, Fife, and Aberdeen. It was used extensively, and a general preference given over every other preparation as a Sheep Wash.
